AVIATION SERVICES INC

Allied - 13 -

Date: diciembre 9,2024

To whom it may concern

Please be advised that the component thereof is being shipped on the attached document.

Nomenclature: Fuel control Unit  
Part Number: 769606-13  
Serial Number: F15289

Had its fuel system flushed, purged, and filled with a non-flammable gas or fluid to nullify the hazard.

As the component no longer contains fuel, it is no longer a "Regulated Commodity" for Shipment under IATA DANGEROUS GOODS REGULATIONS, Section 4. IDENTIFICATION, 4.4 SPECIAL PROVISIONS, A70 "The shipper has provided the operator with written or electronic documentation stating that the flushing, purging, and filling procedure has been followed and the final contents of the component(s) have been tested and verified to be non-flammable."

The final content of the component is NON-FLAMMABLE and NOT RESTRICTED under the above quoted IATA Special Provision A70.

If you have any questions regarding this process, please contact me.

A handwritten signature in blue ink, appearing to read 'H. Quintero', is positioned above the contact information.

**User/Installer Responsibilities**

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1.

Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.
